

How to Update Windows

A simple, step-by-step guide for home users

Step-by-Step Instructions

- **1. Open Settings**
Click the Start menu and select **Settings**.
- **2. Go to Windows Update**
Select **Update & Security** (Windows 10) or **Windows Update** (Windows 11).
- **3. Check for Updates**
Click **Check for updates**. Windows will automatically search for available updates.
- **4. Download and Install**
If updates are found, they will download and install automatically.
- **5. Restart Your Device**
Restart if prompted, or schedule a restart for later.
- **6. Enable Automatic Updates**
Ensure updates are turned on to keep your system secure without manual effort.

Best Practice Tips

- Plug your device into power before updating.
- Save all open work before restarting.
- Run updates when you are not in a rush.

Keeping Windows updated improves security, performance, and reliability. A few minutes today can prevent hours of frustration later.
